EDUCATION

John Tyler Community College, Midlothian, VA

May 2023

Associate of Applied Science, Web Design (3.84 GPA)

Associate of Science, Engineering (3.78 GPA)

May 2020

Associate of Applied Science, Mechanical Engineering Technology, Mechatronics Specialization

May 2018

Graduated with Summa Cum Laude Honors (3.89 GPA)

RELEVANT COURSEWORK

Animation I

Learned basic techniques of animation, combining traditional and computer-generated skills. Teaches theoretical elements of the aesthetics of sequential imagery. Provides practical experience in two-dimensional and/or three-dimensional animation. Exposes the student to a variety of animation techniques

Animation II

Builds on the student's skills in the techniques of animation developed in ART 203 - Animation I. Emphasizes computer-generated, high-quality animations. Teaches the advanced techniques of two- and three-dimensional computer animation

Interactive Design I

Focuses on conceptualization and problem solving for interactive design. Instructs students in techniques specific to web, multimedia for the web and other interactive design projects using current technology and standards. Interactive functionality and usability are covered.

PROJECT-BASED EXPERIENCE

Self-Directed Animation Short, John Tyler Community College

Fall 2021-present

- Develop Cinematic Staging and composition through loose and rough thumbnails and storyboards
- Develop Character and Exterior background animation in an action scene
- Currently in the process of tying down the animation

12 oz. Mouse Re-Animated, Online Collaboration

Fall 2020-present

- Remake existing characters in a new style to iterate on appeal and design while staying true to original
- Divide up the workload amongst the many volunteers in a supportive environment
- Project is still in development until all scenes have been completed

PROFESSIONAL EXPERIENCE

John Tyler Community College, Midlothian, VA

Fall 2020-Fall 2021

Student Tutor

- Tutor 5-6 students per shift in developmental math all the way to advanced Calculus
- Actively listen to students' worries and help them be successful in the coursework
- Support students of all age ranges and backgrounds including people returning to college
